Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-20, 38-64, 73, 74, 75-95 and 112-116, drawn to a method for the isolation of nucleic acid from a sample, classified in class 435, subclass 6.
 - II. Claims 21-28, 38-72, 75, and 76, drawn to a process for performing a nucleic acid amplification reaction, classified in class 435, subclass 91.2.
 - III. Claims 29, 37-72, 75, and 76, drawn to a process for performing chemical reactions on nucleic acids, classified in class 435, subclass 6.
 - IV. Claims 30-39, and 42-64, drawn to a process for the analysis of nucleic acid in an isolation device, classified in class 435, subclass 6.
 - V. Claims 96 and 97, drawn to an apparatus; claims 98-109, drawn to an isolation device; and claims 110 and 111, drawn to an isolation device adapted for the isolation of nucleic acids and claims 117-120, drawn to a kit comprising said device, classified in class 435, subclass 287.2.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I-IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions the inventions are all drawn to different methods comprised of different methods steps and result in different end products.
3. Inventions V and I-IV are related as product and processes of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the

product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product (a device or apparatus) can be used in any of the other methods as set forth in Groups I-IV.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. A telephone call was made to Thomas R. Berka, Reg. No. 39,606 on 22 January 2001 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
